Full Stack Developer with 4 years of experience, specializing in Next.js and React for website development, React Native for mobile applications, and Node.js and Adonis.js for robust and scalable backend solutions. I have comprehensive experience in the full development lifecycle, from conception to implementation, translating ideas into effective technical solutions. Experienced in deploying on Azure and Digital Ocean, with the assistance of Docker.

Work history

2020-01 - present

Full Stack Developer

Freelance

Established effective communication with clients to understand their objectives and specific requirements, ensuring successful collaboration;

Developed interactive dashboards using the D3.js library for visual data representation, implementing various types of charts to enhance data comprehension;

Created an interactive chart with a map of the United States, displaying relevant data to provide efficient visualization for the client;

Developed React Native applications using Expo, integrating them with custom APIs to meet the specific needs of the projects;

Ensured full responsiveness of websites, providing a consistent experience across different devices by adapting layouts and visual elements for both mobile and desktop.

2022-06 - present

Full Stack Developer

Bluepaper, Rio de Janeiro

Leadership in creating dynamic interfaces using Next.js, incorporating reusable components and employing Tailwind CSS for design; Emphasis on developing custom dashboards with a focus on usability and user experience;

Development of interactive PDFs using ReactPDF to enhance information presentation, enabling the creation of customized and dynamic documents;

Development of effective email systems in React, utilizing react-email, to provide efficient interaction and communication; This system was integrated with interactive PDFs;

Development of an interface integrated with Mapbox to simulate a map of a metaverse game structured in landings; In this context, users could make space purchases directly through the interface, with transactions integrated with MetaMask;

Configuration of resources and deployments using Docker; Deployment of complete systems, covering front-end, API, and database;

Leadership in Adonis.js projects, creating API standards as a boilerplate.

2022-12 - 2024-08	**Frontend Developer**
	SmartNX, Juiz de Fora

Direct involvement in implementing complex features, focusing on creating and managing stories, content versioning, and news display;

Crucial role in modernizing system design, with a focus on optimizing user experience;

Close collaboration with the agile team, following Scrum methodology to ensure efficiency and collaboration in development;

Responsible for meticulous control of development tasks, including proper prioritization and progress monitoring;

2022-03 - 2022-06	**Angular Developer**
	BocaVox, Weston

Responsible for the continuous development and maintenance of the internal system, using Angular as the front-end framework;

Daily communication in English due to the international nature of the company, ensuring effective collaboration in a global environment;

Successful implementation of Scrum methodology for effective project management, ensuring efficiency and alignment with objectives;

Development of dynamic components used throughout the system, contributing to the flexibility and adaptability of the internal system;

Proactive approach in resolving bugs to ensure continuous system stability, promoting a consistent user experience;
